Installation Instructions

INSTRUCTIONS:

Available are five o-rings to choose the correct fit for your tub.

1. Remove old tub drain seal.
2. Run the new o-rings under water for lubrication. *Use water only.*
3. Attach the o-rings onto the plastic disc of the new tub drain seal cover and insert into the drain at an angle while applying pressure in a downward circular motion. *Continue with this process until it had securly fit and the tub drain seal cover can be opened and closed without the entire unit moving up or down.*
4. With tub drain seal cover in closed position fill tub with water to makes sure it holds the water. If not, more downward pressure is needed to ensure it's properly placed.
