

## 58292

### Installation Instructions

(Read all instructions carefully  
before installing)

1. Turn off water supply to faucet, remove handle cap, retaining screw and gently lift off handle.
2. Unthread flange, then nipple by turning counterclockwise.
3. Unthread bonnet and remove stem using shower valve socket wrench.
4. Unthread barrel from the stem. Thread new barrel onto the stem.
5. Thread new stem unit into faucet body.
6. Thread nipple into bonnet nut, then thread flange onto nipple.
7. Replace handle, retaining screw and handle cap.
8. Turn on water supply and check for leaks.

**Tools needed for installation:**

- Screwdriver
- Faucet Seat Wrench
- Shower Valve Socket Wrench
